

THE VALUE OF PERSONAL KNOWLEDGE

Personal knowledge is the winning factor in the culminating contests of this competitive age and when of ample character it places its fortunate possessor in the front ranks of

The Well Informed of the World.

A vast fund of personal knowledge is really essential to the achievement of the highest excellence in any field of human effort.

A Knowledge of Forms, Knowledge of Functions and Knowledge of Products are all of the utmost value and in questions of life and health when a true and wholesome remedy is desired it should be remembered that Syrup of Figs and Elixir of Senna, manufactured by the California Fig Syrup Co., is an ethical product which has met with the approval of the most eminent physicians and gives universal satisfaction, because it is a remedy of

Known Quality, Known Excellence and Known Component Parts and has won the valuable patronage of millions of the Well Informed of the world, who know of their own personal knowledge and from actual use that it is the first and best of family laxatives, for which no extravagant or unreasonable claims are made.

This valuable remedy has been long and favorably known under the name of—Syrup of Figs—and has attained to world-wide acceptance as the most excellent family laxative. As its pure laxative principles, obtained from Senna, are well known to physicians and the Well Informed of the world to be the best we have adopted the more elaborate name of—Syrup of Figs and Elixir of Senna—as more fully descriptive of the remedy, but doubtless it will always be called for by the shorter name of—Syrup of Figs—and to get its beneficial effects, always note, when purchasing the full name of the Company—California Fig Syrup Co.—printed on the front of every package, whether you call for—Syrup of Figs—or by the full name—Syrup of Figs and Elixir of Senna.

LADY SOMERSET'S LAST ADDRESS IN PUBLIC

(By Associated Press.)
London, May 2.—Delivered a large crowd at Bridgegate house today Lady Henry Somerset, the widely known reformer, delivered what will probably be her last address in public. The announcement was made by Lady Henry herself, who explained that the fatigue incident to the many calls upon her have impaired her health and that she has found it absolutely necessary to curtail her work.
Though retiring from public life, Lady Henry will carry on her home at Duxhurst, where she will continue to live. She has been before the public for many years and is almost as well known in America as in England. An unhappy marriage led to a separation from her husband and she determined henceforth to give herself to social and reform work. Her first public meeting was a little gathering of villagers from her husband's estate, to whom she spoke a few earnest words for temperance, signing the pledge in their presence. From this beginning she developed into one of the most accomplished platform speakers amongst English women.
The industrial colony founded by her at Duxhurst, in Surrey, is the pioneer institution of its kind. Women of all classes suffering from alcoholism find there pleasant homes where, amongst workrooms and gardens, poultry yards and dairies, they can forget the old influences which have dragged them down.

Alexander Benton, who lives on Rural Route 1, Fort Edward, N. Y., says: "Dr. King's New Discovery is my best earthly friend. It cured me of asthma six years ago. It has also performed a wonderful cure of incipient consumption for my son's wife. The first bottle ended the terrible cough, and this accomplished, the other symptoms left one by one, until she was perfectly well. Dr. King's New Discovery's power over coughs and colds is simply marvellous." No other remedy has ever equaled it. Fully guaranteed by all druggists, 50c and \$1.00. Trial bottle free.

TRAPPING OF WILD ANIMALS.

Jungle Creatures Have No Chance Against Ingenuity of Man.

"Elephants is easy trapped," said a zoo keeper. "Very easy trapped, very easy tamed. The trapper chooses a spot what is a popular elephant haunt, and here he digs a hole five feet deep and 20 foot square. He surrounds this hole with a high board fence, except in one place, where he hangs a swing gate. So far so good. Next he finds a herd of elephants, chooses the animal he wants, maddens it, and makes it chase him. Lickety-split, lickety-split. The man tears along, on his nag, the elephant thunders closely after, and just at the gateway the man swerves to the right, but the elephant, too heavy to swerve, bangs right on through, kerthump, into the hole. He's mad at first, outraged, terrible, but they give him no food nor drink, they build around the pit fires of damp wood that suffocate him nearly with the smoke, and they daze him with shouts and the banging of brass pans. That there wild elephant is completely broke and subdued in three or four days. He comes forth and follows the trapper humbly and timidly, with tears in his eyes. Monkeys is trapped—ain't it a shame?—with booze. You rush in among a flock of them, and they take to the trees, chattering and watchful. You pull out some bottles of strong, sweet booze, pretend to drink from them, then lay them down and go away. On your return an hour later the floor of the jungle is strewn with the limp, slim bodies of drunken monkeys. The only animal impossible to trap is the gorilla. Too strong and fierce."

MIGHTY CITY OF LONDON.

Its Million Houses and Hundreds of Millions of Income.

The 6,500,000 people in Greater London live in 238,008 houses. The population 100 years ago was just one-fifth what it is now. Though the number of births was nearly double the number of deaths in 1904, the birth rate is steadily declining. The postal figures show that in 1905 there were 1,028 post offices in London, and 2,435 public telephones working. The total imports at London in 1904 amounted to \$349,008,000, and the total exports \$402,299,000. Some idea of London's wealth is shown by the assessed income tax value in 1904 in the administrative county, houses representing \$219,264,000, trades and professions \$364,045,000 profits of companies and other interests \$608,511,000, salaries (corporate bodies) \$112,044,000, salaries (army and navy) \$103,674,000. In 1905 there were 2,993 motor cars and 1,852 motor cycles in London. Licenses to drive were granted to 8,070 people, the fees received amounting to \$36,500.—Statistical Abstract.

Two Men to Each Shovel.
There were two children to each pair of roller skates and very contentedly the urchins hopped and slid along. "Two kids to a pair of skates," remarked the sailor, "takes me back to India, where they run two men to a shovel. You see, the Indian native is a weakling—no wonder, consider! the hot, damp climate—and one man to a shovel is too strenuous. So with a cord tied to the handle down near the blade the shovel does for two, the man at the cord helps to insert the shovel by pulling toward himself and helps to lift and toss the dirt by swinging it away from himself. Two men to a shovel is a characteristic of India and of no other country what I have ever saw."

No Century Begins on Sunday.
There are some curious facts about our calendar. No century can begin on Wednesday, Friday or Sunday. The same calendars can be always used every 28 years. October always begins on the same day of the week as January, April as July, September as December, February, March and November also begin on the same days. May, June and August always begin on different days from each other and from every other month in the year. The first and last days of the year are always the same. These rules do not apply to leap year, when comparison is made between days before and after February 29.

The Accepted Time.
"Do choir am now about to vociferate," said old Parson Bagster, during a recent Sabbath morning's service in Ebenezer chapel, "and uh-whilst dey am a-doin' of it, I solemnly suggests dat de mothers of dem sassy child'en dat has been uh-sturbld' de congregation on dis occasion to spank 'em. Dis special song will rise loud and high, mah sisters, and so uh-whilst yo' do yo' duty dees do it wid zeal and liberality. Spar de spank and spile de child—give it to de little varmint hot and heavy, and de Lawd will bless yo', and de rest of us will owe yo' a vote o' thanks. De choir will now po' to th'ir hozaners."—Puck.

He Ate the Nail.
Two Marcellianes, says Ron Vivant, were discussing the best method of eating game. "Well," said one, "if it is woodcock I hang it up on a nail by the beak, and fasten some larks to its claws. After a week I throw away the woodcock and eat the larks, which by that time have absorbed all the flavor of the woodcock." "I do the same," replied the other, "not to be outdone, I except that I throw away the larks as well as the woodcock, and eat the nail."
